At the forefront of New York City's aesthetic innovation is Dr. Anna Avaliani, MD, a trailblazer in noninvasive cosmetic medicine on the Upper East Side. Known as the "Queen of Lasers," she offers one of the most advanced collections of technology in the country, with over 36 FDA-approved laser devices and more than 20 injectable options. Every treatment she performs is thoughtfully customized, reflecting her belief that no two patients are alike. Her work is subtle yet transformative—each result a testament to her precision, artistry and commitment to natural beauty.

A true leader in her field, Dr. Avaliani is a Diplomate of the American Board of Medical Specialties and a member of the American Academy of Cosmetic Surgery. She serves as a National GAIN Trainer for injectables, sits on the prestigious Galderma Faculty and advises multiple national anti-aging committees. Her expertise has made her a trusted resource for patients ranging from global executives to icons in fashion, entertainment and sports.

"I believe the best work is invisible," says Dr. Avaliani. "My goal is always to enhance, never to change—results should look natural, elegant and uniquely you. I value long-term relationships, not quick fixes. My patients often call me an artist—and that's a compliment I cherish, especially when it comes from some of the world's most renowned artists who trust me as their discerning eye."

Her success is grounded in medical mastery, a refined eye for symmetry and an unwavering dedication to ongoing innovation. She has wanted to be a doctor since the age of five and credits her patients—their trust, stories and encouragement—for shaping her into the physician she is today.

SPECIALTIES

State-of-the-art laser and aesthetic center specializing in full-face and body rejuvenation with invisible, natural-looking results.

"I've created a one-stop destination specializing in all things noninvasive—for both the face and body. With a collection of 36 laser devices and more than 20 injectables, I craft bespoke treatments tailored to each patient, achieving results that are both invisible and undetectable—true works of art. My work and reputation speak for themselves."
